

Nebraska Beef is voluntarily recalling primal, sub-primal and boxed beef that may be contaminated with E-coli 0157:H7. This includes Top Rounds, Chuck Short Ribs and Cross Cut Shanks from Nebraska Beef that were distributed to some of our stores in early July, and that had sell-by dates through as late as July 31. This also includes any fresh ground beef that may have been used in chorizo, also dated through July 31, 2008.

We received only a fraction of the total volume of Nebraska Beef distributed during this time frame, and have since replenished our supply several times. Customers who still have the above-mentioned products bought during the time specified may return them for a refund or replacement. We apologize for any inconvenience.
